

ENGINEERING FACULTY

DEPARTMENT OF CIVIL ENGINEERING

| | 1 st Week | 2 nd Week | 3 rd Week | 4 th Week |
|------------------|-------------------------------------------------------------------------|-------------------------------------------------------------------------|-----------------------------------------------------------------------|-----------------------------------------------------------------|
| MONDAY | University and Faculty Introduction | Construction Materials Lab. Visit and planning the experimental program | Structural Mechanics Lab. Visit and planning the experimental program | Concrete Canoe Lab. Visit and planning the experimental program |
| TUESDAY | Visitors presentations and planning the working program | Experiments in construction material lab. | Workshop on Ultra High Performance Concrete | Workshop on Light weight concrete |
| WEDNESDAY | Civil Engineering Laboratory visit | Experiments in construction material lab. | Ultra high performance concrete production | Light weight concrete production |
| THURSDAY | Theoretical graduate courses | Experiments in construction material lab. | Tests on Ultra high performance concrete | Tests on light weight concrete |
| FRIDAY | Company visit Vardar Beton Concrete infrastructure materials production | Company visit Altın Beton Ready-mix concrete plant | Company visit Altın Çimento Cement Production Factory | Company visit Closing Ceremony |

Theoretical courses will be organized according to the permission of the Department staff. Social Programs will be discussed and decided on the dates.

This program may rearrange later by lateral organization
