

## **General Information on Programmes Adopted by the President of the Republic of Uzbekistan, the Government and the Ministry in the Mining Industry and Geology Sector**

A number of important documents have been adopted in the mining industry and geology sector, focusing on such priority areas as the development of a sustainable mineral resource base, expansion of production capacities, and introduction of innovative technologies. In particular:

- in order to ensure the timely achievement of the target indicators set forth in the Uzbekistan–2030 Strategy, the Presidential Resolution of the Republic of Uzbekistan “On Approval of the Comprehensive Program for the Development of the Mineral Resource Base for 2026–2030” has been prepared this year;

- in order to ensure the timely implementation of projects aimed at achieving production targets for precious metals, the Presidential Resolution of the Republic of Uzbekistan “On Measures for the Sustainable Development of Precious Metals Production in the Republic through 2030” has been developed;

- the Presidential Resolutions of the Republic of Uzbekistan “On Additional Measures for the Introduction of Innovative Technologies in the Mining and Geological Sector and the Development of Education and Research” are also among these key documents.

In addition, the following Presidential Resolutions of the Republic of Uzbekistan have been adopted to support the development of sectoral enterprises, with specific measures approved thereunder. These include:

- expansion of non-ferrous and precious metals production based on the deposits of AMMC JSC during 2024–2028;

- sustainable development of Navoi Mining and Metallurgical Company JSC through 2030;

- additional measures for expanding the raw material base of critical minerals for industry and accelerating their production during 2025–2026.

At present, pursuant to Presidential Decree No. PF-21 dated 16 February 2026, a draft Presidential Resolution “On Approval of the Strategy for the Development of the Mining Industry and Geological Sector through 2030” has been prepared and is currently being coordinated with the relevant ministries and agencies.
